FAIRWEATHERSCIENCE

Marine Mammal Project Support

Effective and efficient solutions to
a broad range of projects

FAIRWEATHERSCIENCE

Marine Mammal Services for Alaska

Why Choose FAIRWEATHERSCIENCE?

We are proficient at navigating Alaska's unique **regulatory, ecological, and logistical** challenges.

Our team has **years of technical and field experience** – we know how to meet agency requirements while balancing project needs.

We have the **knowledge and experience** to design and implement **all aspects** of a marine mammal monitoring and mitigation program, from permitting to data reporting.

Permitting & Compliance

Fairweather Science prepares permit applications for clients and coordinates with agencies to develop comprehensive monitoring and mitigation programs.

- Incidental Take Regulations petitions
- Letters of Authorization
- Incidental Harassment Authorization
- Marine mammal monitoring and mitigation plans

Marine Mammal Program Expertise

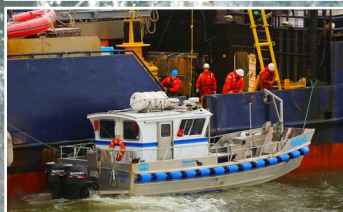

Logistics & Observation:

- Multi-platform expertise in waters from Southeast Alaska to the Arctic Ocean:
 - Vessel
 - Shore
 - Aerial
 - Offshore platforms

Data & Monitoring Services:

- Customized data collection software
- Real-time mapping of sightings and mitigation zones
- Real-time tracking of enacted mitigation measures
- Standardizes data and facilitates reporting
- Acoustic analysis and assessment
- Sound source verification management

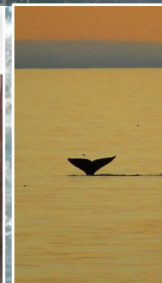

Strong Working Relationships

- 25+ observers on contract with experience observing Alaskan waters from the air, land, and sea
- Collaborative approach and established rapport with NMFS and USFWS
